OBJECTIVE

To secure a challenging position in a growth-oriented organization where I can apply my skills in web development, UI/UX design, and Android application development to build user-friendly and efficient solutions, while continuously enhancing my technical knowledge and contributing to organizational success.

EDUCATION

Velammal College Of Engineering and Technology **2023 - 2027**

- B.Tech - ITCGPA - 8.51 (upto 6th sem)

O.C.P.M girls hr. sec. school Madurai **HSC 2022 - 2023**
Score - 86.8%

Government High School, Oomachikulam, Madurai **SSLC 2019 - 2020**
Score - Pass

PROJECTS

■ Detection of Dental Anomaly in X-rays

Developed An AI-based system that detects dental abnormalities in X-ray images using super-resolution and deep learning techniques. The project enhances image quality for accurate analysis and compares dental patterns to support early diagnosis and improve detection accuracy.

■ Smart India Hackathon 2024

Participated in Smart India Hackathon (SIH) 2024 by presenting the project "Mobile App for Direct Market Access for Farmers," designed to connect farmers directly with buyers through a digital platform.

INTERNSHIP

I Completed my Web Development internship at NSIC Technical Services Centre in Chennai. During this internship, I learned HTML and CSS and developed a Quiz Website as a mini project. This experience enhanced my front-end development skills and provided practical exposure to web development.

IEEE PAPER PUBLISHED

- Presented the project "Detection of Dental Anomalies in X-rays using Super Resolution and Siamese Contrastive Loss Models" at an IEEE conference. The system enhances dental X-ray images and detects anomalies using AI for accurate diagnosis.
